M.B.A. Finance
Temple University

B.S. Computer Science
University of Pittsburgh

COMMUNITY SERVICE

- School Board Director, Upper Moreland School District
- Treasurer, St. David CYO

Summary

- Principal Product Designer — 11+ years in fintech Enterprise & B2B2C products, following a distinctive dev → PM → Scrum Master → Agile coach → design career path
- Cross-functional collaborator across Product Management, Product Design, and Development
- Self-initiated AI-assisted product pipeline — PRD through deployed React application — demonstrating full end-to-end delivery
- In-depth knowledge of Treasury and Commodity fintech products
- Strong analytical and problem-solving skills applied to data-dense transactional UX

Self-Initiated AI Projects

Sterling Design System Oct 2026
- Tokens, Figma library & Storybook, built with Claude Code under my direction

AI-Enabled (Narration & Assistance) Aug–Sep 2026
- Extended the AI Pipeline app (below) with narration + a natural-language Scenario assistant
- Every narrated figure sourced from the deterministic engine, every action human-confirmed · replaced PM→PD→Dev handoffs with two living context files

AI Pipeline (0 to 1 Product Delivery) Apr–Jul 2026
- PM → PD → Dev pipeline: product requirements, component library, Figma prototype, deployed React app
- Real tax-optimization engine · unit tests · Notion MCP · Atlassian Rovo MCP · Figma MCP

AI-Assisted Development (Live Application) Mar 2026
- Full-stack Next.js + FastAPI app built via Claude Code autonomous builds · Vercel deployment

AI-Assisted Product Design (Prototypes) Feb 2026
- End-to-end design: research → data model → component library → wireframes → prototype · 4 sessions using Claude AI, Figma, and Tokens Studio

ION Group, Horsham PA

Principal Product Designer — Enterprise, B2B & B2B2C 2014 to 2025
- Concept to completion of Enterprise fintech design projects for ION's Corporates group
- Collaboration with stakeholders and cross-functional teams · user research · personas · advisory board sessions
- Wireframes, prototypes, and hi-fi designs using Figma with token-based design system
- Iterative design from usability testing · WCAG 2.1 AA accessibility
- Data-dense decision support: progressive disclosure, real-time updates, inline grid editing
- Established UX community of practice across multiple product teams

Lean & Agile Coach 2013 to 2014
- Kanban system design and Scrum Master for product teams across time zones
- 21% cycle-time reduction

Financial Software Systems, Inc., Horsham PA

Acquired by ION Group, Dec 2012

Senior Vice-President 2008 to 2012
- Established Hosting Business for SaaS sales · IT group supporting 150+ employees

Vice-President 2000 to 2008
- System Architect and R&D manager to replace legacy desktop app
- Established and managed Web development team

Product Manager 1997 to 2000
- Managed financial research, software development, QA, documentation, and recruiting

Software Engineer 1996 to 1997
- Designed and implemented Portfolio Analysis component — key competitive advantage
